Steer and Trailer

DECTES*
DUNLOP Energy Control Technologies

APPLICATION

Designed for highway usage on long-distance, laden trucks. The benefits of the DECTES technology is especially apparent in the steer position. Benefits include:

- Longer life with reduction in uneven wear
- A compound designed to provide a more wear-resistant tread
- Good retreadability
- Excellent CPK, through the combination of all benefits.

*DECTES (Dunlop Energy Control Technologies) is a combination of innovative design technologies aimed at controlling heat energy build-up and energy loss whilst ensuring a more consistent contact patch; resulting in lower rolling resistance, higher mileage, a more wear resistant tread and a reduction in uneven tread wear all contributing to excellent CPK.
