

# BE TWICE AS SAFE ON YOUR JOURNEY - WITH DUNLOP

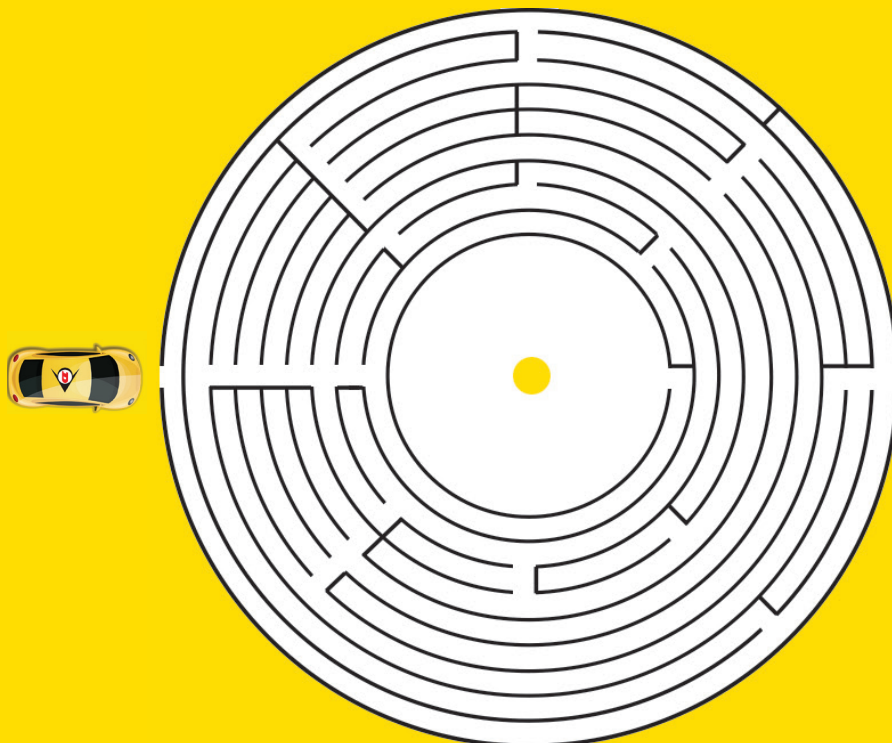

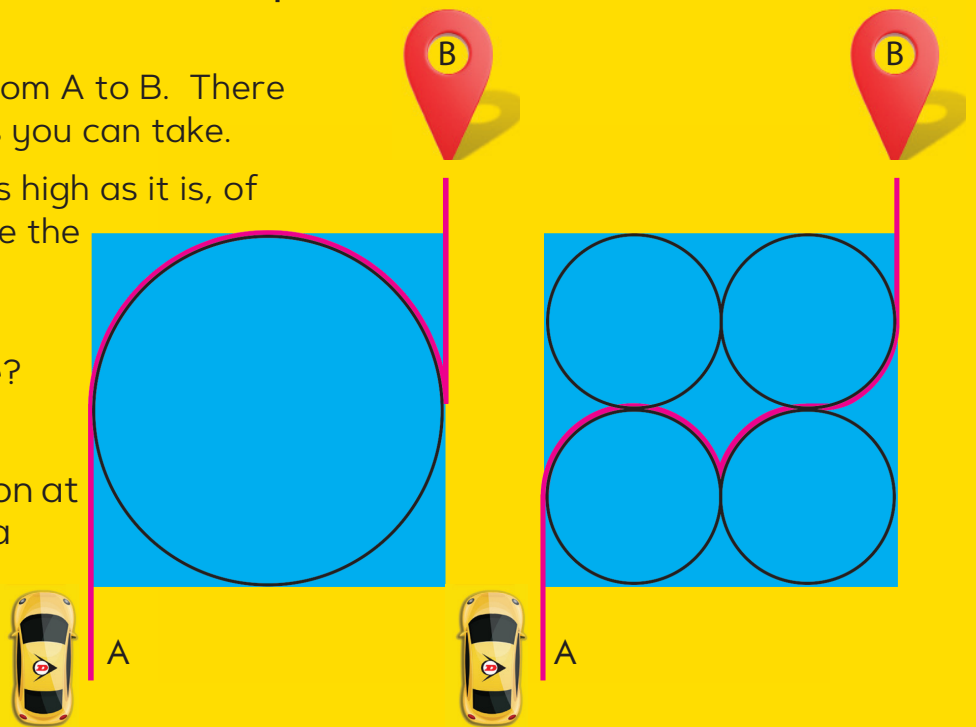

1. Stay sharp, prevent driver fatigue. Why not take a break and do this puzzle?

You're on a road trip from A to B. There are two possible routes you can take.

With the price of fuel as high as it is, of course you want to take the shortest route.

So do you take the left route or the right route?

Answer and explanation at [www.dunloptyres.co.za](http://www.dunloptyres.co.za)

Are we  
there  
yet??

Hey kids! Want to make the journey seem a bit quicker? Grab a pen and see how long it takes you to find the route through the maze....

 **DUNLOP**  
TAKE THE ROAD

## 2. Be sharp, always buy brand new tyres from a reputable dealer

Second hand tyres are temptingly cheap. But they're cheap for a reason - they are potentially dangerous. Often they are unevenly worn, have been damage-repaired and always have a shorter lifespan. They might not even be the correct size for your rims.

Second hand tyres carry no factory warranty and have no track record. Be **#SaferThanSafe**, choose new tyres and know what you're buying.
